

# PORTERAGE SCARF

---

## BRING WARMTH AND PROTECTION TO THE NEW BORN

---

There is quite a simple and easy way to save lives of premature babies. Also referred to as the “Kangaroo Mother Care” (KMC), it enables new born children at risk -meaning they are not unhealthy but simply premature or weighting under 2kg- to receive special attention, thanks to a constant and very close contact with their mother or carer.

Because Kangaroo Mother Care only needs a very basic training, a comfortable sitting area and a fabric scarf, it is perfectly suitable for the tough situations we are used to work in.
